| **Use Case Name:** | Complete education module | | |
| **Use Case ID:** | UC-03 | **Last Updated By:** | Aneeta |
| **Created By:** | Aneeta | **Last Revision Date:** | 10-24-2025 |
| **Date Created:** | 10-23-2025 | | |
| **Description:** | This use case occurs when a user identifies themselves as a new investor and wants to learn from the education module. It begins when the user selects the "Start Module" option on the website. The purpose for this use case is to allow users who are new to investing to learn about globally diversifying investments. | | |
| **Primary Actor:** | User | | |
| **Supporting Actors:** | Not Applicable | | |
| **Offstage Actors:** | Content creator | | |
| **Stakeholders and Interests:** | Content creators: Care about user interaction with the education module as they are in charge of creating the modules and making updates. | | |
| **Preconditions:** | User is logged in, user has indicated that they are new to investing | | |
| **Postconditions:** | • User will have completed education module<br>• User receives a completion badge | | |
| **Main Flow:** | 1. User selects "Start Module" from the web application<br>2. System begins the education module<br>3. User goes through the different units within the education module<br>4. User completes the education module<br>5. System provides a badge for the user to display on their profile | | |
| **Alternative Flows:** | 3.a. If the user would like to pause in their progress, or exits the education module halfway, the system automatically saves the point as which the user disengages with education module.<br>3.b. When the user returns to the module, they will continue learning from where they left off. | | |
| **Exceptions:** | 5.a. If the user has already completed the education module once, there will not be an additional badge provided to the user. | | |
| **Non-Functional Requirements:** | • Usability:<br>- The education module interface must be responsive and accessible across all computer and mobile devices.<br>• Reliability: | | |

| | |
|---|---|
| | - The system must save user progress every 10 seconds<br>• Performance:<br>- The education module must load within 5 seconds with all media (especially videos) properly displayed.<br>• Supportability:<br>- Education modules must be kept up to date with current information. |
| **Frequency of Use:** | Fluctuating: Expected many users to begin with the education module, but as more users complete the education module, they will move over to use the diversification visualizer instead. |
| **Assumptions:** | • Users Access: Users have access to a solid internet connection and are at the legal age to begin investing.<br>• System Time: The system clock is accurate and on time for saving user progress. |
| **Notes and Issues:** | Education modules will continue to go through updates to improve user experience |
