SystemTimer
- ...
- refreshPage()

UserDashboard
- ...
- loadDashboard()
- refresh()
- displayDiversityReport()

PortfolioDiversityReport
- - riskScore: int
- - recommmendation: String
- getReport()
- calculateRiskScore()
- export()

VisualData
- - graphType
- - dataSource
- - title
- - graphData: String
- generateGraph()
- getDataSource()
- updateGraph()

GlobeVisualization
- - title: String
- - url: String
- displayGlobe()
- updateGlobe()
- colourCodeRegion()
- allocateCurrencyToGlobe()

User
- - name: String
- - age: int
- - email: String
- userInformationToString()
- updateEmail()

Account
- - accountId: String
- - password: String
- - logInStatus: Boolean
- login()
- logout()
- updatePassword()
- verifyLoginCredentials()

AIProcessor
- - supportFileType
- - version: String
- - Suggestions: String
- validateFileFormat()
- processUserFile()
- extractData()
- generateReport()

Portfolio
- - originalCurrency: String
- - portfolioName: String
- - totalValue: double
- addInvestment()
- removeInvestment()
- calculateTotalValue()

PortfolioDataFile
- + fileType: String
- + fileSize: int
- - fileName: String
- - fileStatus: String
- upload()
- validate()
- getFileStatus()

Country
- - name: String
- - currencyType: String
- getCurrency()
- getCountryInformation()

Investment
- + quantity: double
- - purchasePrice: double
- calculateValue()
- getValue()

ExchangeRate
- - fromCurrency: String
- - toCurrency: String
- - rate: double
- getRecentRate()
- convertAmount()
- updateRates()

InvestmentCategory
- + investmentType: String
- + investmentName: String
- - amountInvested: double
- getInvestmentAllocation()
- assignCurrency()
