Topic: Privacy Policies across domestically and globally

Objectives:

This study explores how privacy policies affect investors in both domestic (Canadian) and international contexts. It aims to identify key regulations, data handling practices, and investor rights across major jurisdictions.

Domestic Investment (within Canada):

PIPEDA applies to private-sector organizations across Canada that engage in commercial activities, as well as to the employees of federally regulated businesses. The law does not apply in provinces with private-sector privacy laws that are considered "substantially similar" to PIPEDA, such as Alberta, British Columbia, and Quebec. In these cases, the provincial law applies instead.

How it works: Individuals have the right to know why their information is being collected, to access it, and to request corrections.

Globally:

Every continent and country has different rules and privacy policies to protect the privacy of the investor. Today, more than 170 countries have enacted data privacy regulations, with new data protection laws introduced each year The privacy policies and acts that plays the crucial role in the investment markets are

Investment Canada Act (ICA): Foreign investment is important to Canada's economic success as it can enhance economic growth, support new technologies, create good jobs for Canadians, and provide Canadian firms with access to global supply chains. The Act allows the federal government to conduct a national security review of any foreign investment, regardless of its value and whether it is subject to the mandatory filing requirements of the Act. The Act applies to a broad range of investments including acquisitions, greenfield and minority investments.

EU Laws: The General Data Protection Regulation (GDPR) applies to organizations that process the personal data of “anyone in EU territory”, regardless of whether or not there is payment. It doesn’t matter if the company is headquartered in the EU or even has a physical presence there. People have the right to know what’s happening with their personal information. Before any data is collected, they should be told:

- Who's in charge of handling their data.
- Why their data is being collected and how it will be used.

South Africa's POPIA: The Protection Of Personal Information Act(POPIA) is a comprehensive framework that protects South African residents' personal data. The law applies to any natural or juristic person who processes personal information by either automated or non-automated means. While this includes individuals, the law most commonly affects companies, organizations, and government entities.
